

SECONDARY MATHEMATICS AND SCIENCE INITIATIVE (SMSI)

Fully funded post graduate
university qualification for DET teachers
in 2022

The Secondary Mathematics and Science Initiative is designed for current out-of-field mathematics or science secondary teachers to support them to further their pedagogical content knowledge and practical teaching skills.

Participants will complete either a Graduate Certificate of Mathematics or Graduate Certificate of Science by engaging with contemporary, research informed approaches to teaching and learning mathematics or science that is aligned to Victorian Curriculum Levels 7–10.

Graduates expand their career opportunities with a qualification recognised by DET for teaching Years 7-10 Mathematics or Science. Upon completion, eligible participants may enrol in the Master of Education.

In 2022, this course, with limited places, is offered in conjunction with the Victorian Government Department of Education and Training (DET). Funding is provided for DET schools and participants.
