Contemporary Approaches to Research in Mathematics, Science, Health and Environmental Education Symposium

This symposium will focus on practical and theoretical aspects of research methodology. It follows the highly successful symposia held annually from 1993 to 2005 and again from 2010 to 2021, in which methodological techniques and issues (such as socio-cultural perspectives, productive use of quantitative data, collaborative practitioner research designs, analysing discourse) have been discussed in a lively, informal setting.

Keynote speakers

Louise Archer

Karl Mannheim Chair
of Sociology of Education,
University College London.

Ly Tran

Professor of Education
and ARC Future Fellow
Deakin University.

Submit an abstract

If you are interested in presenting at this symposium please register your expression of interest before Friday 7 October 2022 on the Re-Imagining Futures in STEME website (deakinSTEME.org), which provides full details and a template for your proposal.

Presenters will be asked to submit a short written paper of 3 to 5 pages for online publication in the symposium proceedings.

Each presentation should be 10-15 minutes in duration, and briefly outline the research question being addressed and may include the findings or likely outcomes of the research, but should focus mainly on the research methodology.

Reports on work in progress are welcome.

Registration

Deakin students:	\$55 per day
Deakin staff and non-Deakin students:	\$75 per day
General public:	\$95 per day
