

Contemporary approaches to research

in mathematics, science, health and environmental education symposium

21-22 November 2024, Docklands & online

Each year this symposium focuses on practical and theoretical aspects of a range of research methodologies – such as cross-cultural perspectives, activity theory, capturing complexity, classroom video analysis, quantitative methods, and interviewing – which are discussed in a lively, informal setting.

Keynote speakers

Linda Hobbs
Associate Professor of
Science Education
Deakin University

Justin Dillon
Professor of Science and
Environmental Education
University College London

Submit an abstract

If you're interested in presenting, please register your expression of interest before Friday 11 October 2024 at deakinste.me.org/event/2024carsymposium.

Registration

\$55-\$95 per person, per day or free (online)
